Career Objective

I am a full stack web developer and an aspiring mobile application developer with more than seven years of experience in the industry. I have experience in developing highly specialized websites & mobile applications using modern technologies like WordPress and React Native. I'm also well versed in DevOps and System Administration. Problem solving is my speciality. My aspiration is to gain employment in a dynamic environment where I can sharpen my existing skills, acquire new talents and use all my expertise to add value to the organization.
